Wilmington, NC 28405

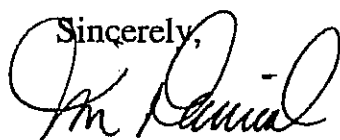

Dear Rhonda,

When I decided to build a new home in the Wilmington area I wanted to take advantage of the most energy efficient building systems available. The selection of a capable HVAC contractor was very important to me. After inquiring with other builders in the area I selected your company based on their recommendations. These recommendations proved to be true when this project was completed.

I wanted to use a sealed crawl space and spray foam insulation in the design of this home, taking advantage of the latest in energy efficient technology. It was important to install properly sized HVAC equipment to maximize the efficiency of this design. Your knowledge and assistance during the design phase proved to be invaluable.

The suggestions you made for the sealed crawl space and the installation of the systems for this space by your company have worked out very well. I am convinced that the sealed crawl space is the way to go when building over a crawl space.

I want to thank you and your staff for a job well done. As you can tell, I am a very satisfied customer and if you ever need to use me as a reference please do not hesitate.

Sincerely,

Jim Daniels
